5. Impact & Future

The screenshot shows the KUAS_Lite_Navi mobile application interface. At the top, there is a status bar with the time 1:27, signal strength, and battery level. Below the status bar is a blue header with the text "KUAS_Lite_Navi" and a three-dot menu icon. The main content area has a white background and contains several input fields and buttons. At the top of the main area are five buttons labeled "月", "火", "水", "木", and "金". Below these are input fields for "曜日", "講時", "科目名", "教室", "シラバス", "教授", "テスト結果", and "その他". There are three buttons labeled "保存", "閲覧", and "消去" below the "講時" field. A button labeled "取扱説明書" is located below the "その他" field. At the bottom, there is a label "言語/language" followed by an input field. The bottom of the screen shows a blue bar with a white line, indicating the home indicator.

Problem

College students simply don't have enough time!!

Why?

Insight

They were given more freedom!!

- A lot of freedom aren't permitted until

High school Graduate

- The distance between them and their families grows

=That's why We are Freedom!!

Solution Overview

- Universal passport RX aren't User friendly.
 - = We're wasting time.
 - If you use this-solution,
 - You'll live two minutes longer of per count!

Key Features

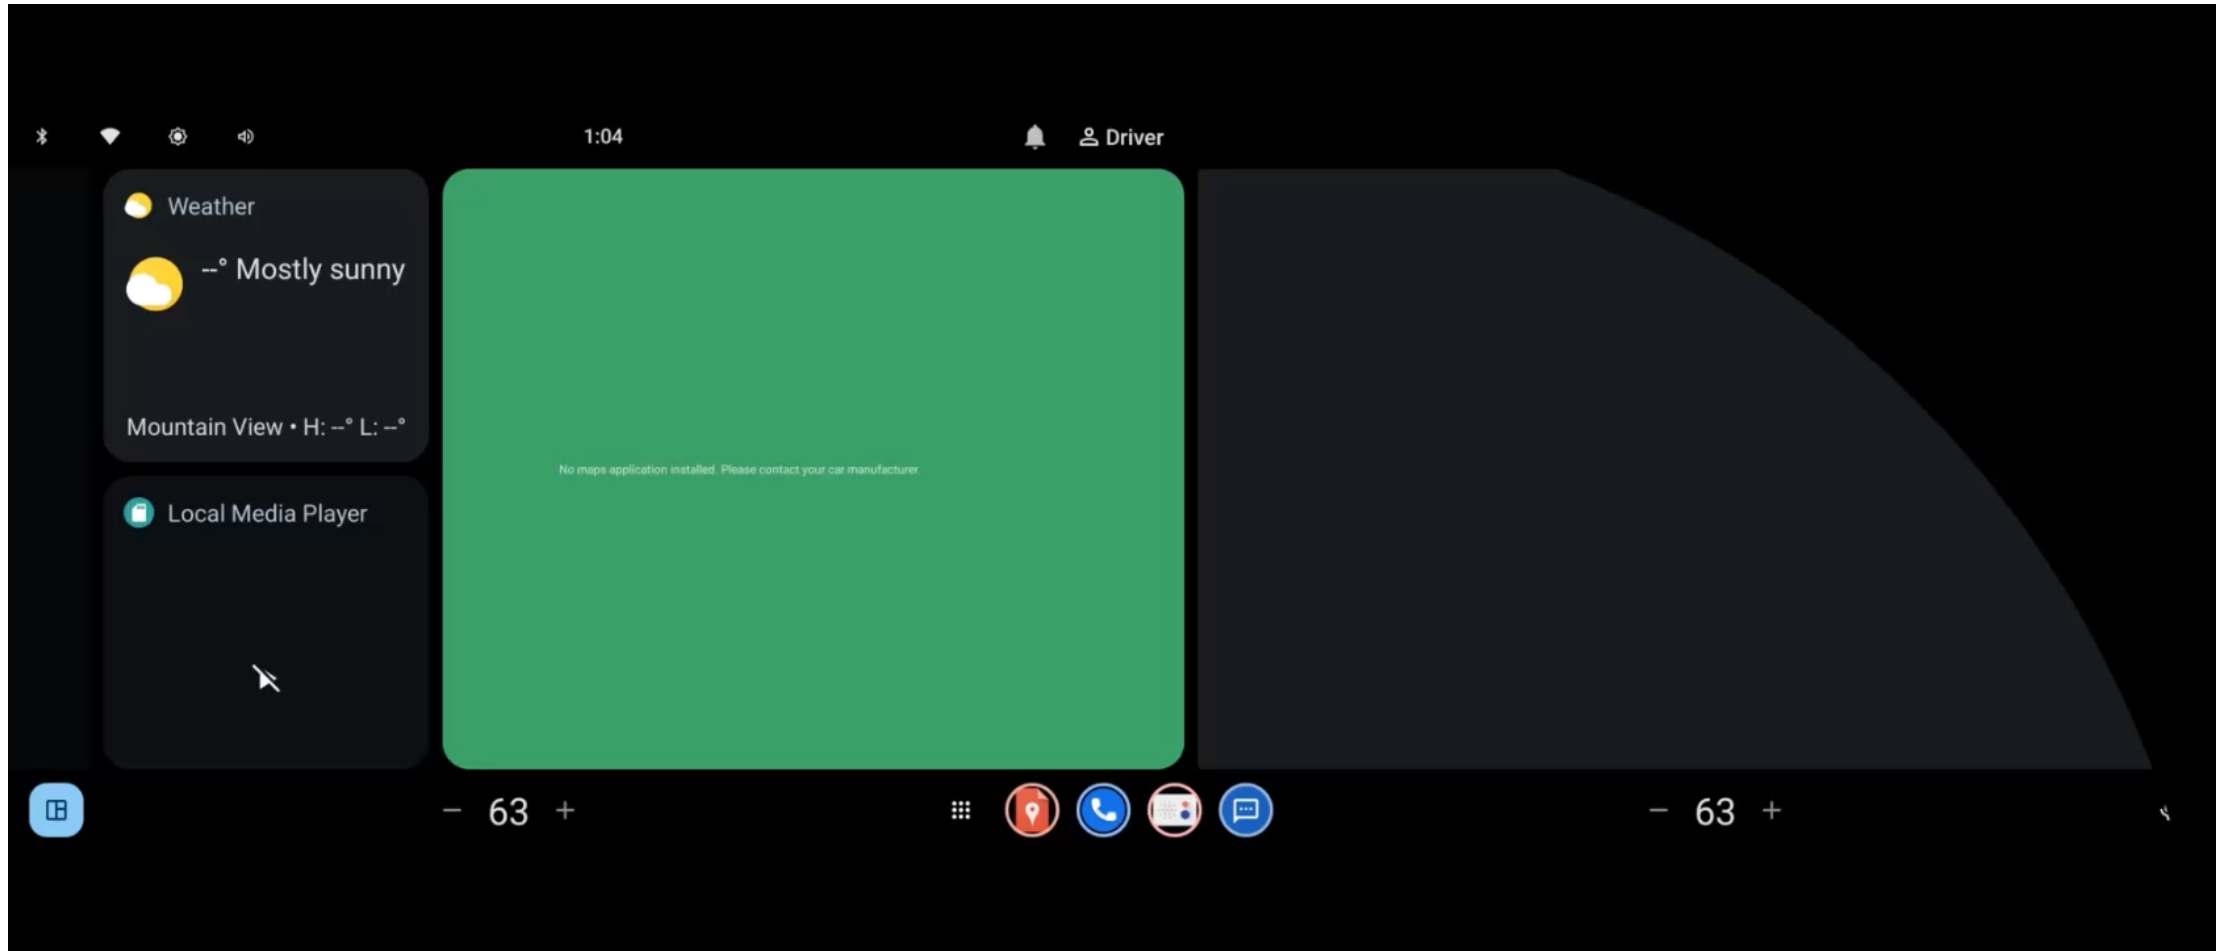

- If you choose a day of the week,
Display the weekday that corresponds
to the period, subject, and classroom.
- When you fill weekday and period,
Display all the information for that time.
- If you enter a language in the
“Language” field of the user manual,
It will be displayed in that language.

The screenshot shows the KUAS_Lite_Navi app interface. At the top, there's a status bar with the time 1:27 and various icons. Below it, the app title "KUAS_Lite_Navi" is displayed. The main form has a header with days of the week: 月 (Monday), 火 (Tuesday), 水 (Wednesday), 木 (Thursday), and 金 (Friday). Below this, there are input fields for 曜日 (Day of the week), 講時 (Lecture time), 科目名 (Subject name), 教室 (Classroom), シラバス (Syllabus), 教授 (Professor), テスト結果 (Test result), and その他 (Others). There are three buttons: 保存 (Save), 閲覧 (View), and 消去 (Delete). Below these is a button labeled 取扱説明書 (User Manual). At the bottom, there is a field for 言語/language.

Tech & Implementation 1

- Introduced Java Cord to MIT Inventor via Extender.

```

J TimetableManager.java ×
C:\>Users>syun1>Downloads>J TimetableManager.java >{} com.example.timetablemanager
31 public class TimetableManager extends AndroidNonvisibleComponent {
38     private final int[] periodEnds = {630, 730, 870, 970, 1070, 1170}; // 1限~6限終了時刻
39
40     public TimetableManager(ComponentContainer container) {
41         super(container.$form());
42         this.context = container.$context();
43         // Load stored data initially
44         LoadData();
45     }
46
47     // --- Subject Management ---
48
49     @SimpleFunction(description = "講義情報の登録及び更新")
50     public void AddSubject(String day, int period, String title, String room, String professor, String category, int credits, String notes) {
51         String key = day.trim() + "_" + period;
52         Subject existing = subjects.get(key);
53
54         Subject newSub = new Subject(title, room, professor, category, credits, notes);
55         if (existing != null) {
56             // Keep existing tasks
57             newSub.tasks.addAll(existing.tasks);
58         }
59         subjects.put(key, newSub);
60         SaveData();
61     }
62
63     @SimpleFunction(description = "指定した曜日・時限の講義情報削除")
64     public void DeleteSubject(String day, int period) {
65         String key = day.trim() + "_" + period;
66         if (subjects.containsKey(key)) {
67             subjects.remove(key);
68             SaveData();
69         }
70     }
71
72     @SimpleFunction(description = "指定した講義が登録されているか判定")
73     public boolean HasSubject(String day, int period) {
74         return subjects.containsKey(day.trim() + "_" + period);
75     }
76

```

Impact & Future

Impact

- They said the instruction manual was revolutionary.
- They said it may be unstable depending on the version.
- It couldn't be used on an iPhone.

Future

- Improving Stability.
- Make it compatible with Apple products.
